

GDTB-1 Gauge Data Transportation Box

GDTB-1 Gauge Data Transportation Box is a data process box specially developed for collecting the data from Mitutoyo digital gauges and sending to PC directly.

With GDTB-1, operator just needs to press the button to transfer the data from any Mitutoyo digital gauges to lots of files in PC instead of keyboard typing, available for "Word file", "Excel file", "txt" file and so on... It will be much more efficient and it can avoid typing errors.

Technical specifications:

- Overall size: 70 x 45 x 25 mm
- Equipped with transferring cable
