

PSC-GRF11N

Ratio pyrometers with fiber cable for industrial applications

Overview

Digital 2-color pyrometers with 0/4-20mA and RS-485 interface

Features

- Temperature ranges from 300°C to 2300°C
- Fast speed of response - 5 ms
- Variable focus optics from 0 to 98 inches
- Laser Aiming
- Small spot sizes starting from 0.7mm
- RS-485 Modbus RTU interface
- Display and keyboard for pyrometer settings
- Ambient temperature up to 250°C
- Immune to Electromagnetic Interference
- Accepts remote input from PLC

Description and applications

The digital ratio pyrometers PSC-GRF11N series are specifically designed for industrial temperature measurement starting from 300°C. The 2-color model is capable of a wide range of measurement, independent of emissivity.

The cast aluminum housing with fiber optics cable allows usage in harsh environmental conditions. The bright temperature display is visible over a long distance.

With a fast response time of 5 ms (t_{95}) these pyrometers are suitable for quick measurement processes. The variable focus fiber optical lens provides spot sizes from 0.7 mm in diameter.

The integrated laser provides precision aiming to the measured object. The linear temperature output signal of 0/4 to 20 mA makes it easy to incorporate the pyrometer in existing measurement and control systems.

The device is equipped with a galvanically isolated RS-485 interface, which allows parameterizing & software evaluation even in bus systems.

All parameters are adjustable via push-buttons and displayed directly on the electronics box. By using the convenient parameterizing & evaluation software PSCSpot, settings can easily be adjusted from a PC.

Applications include:

- Induction heating
- Semiconductor processes
- Heat treating
- Composites and Ceramics
- Kiln engineering
- Vacuum Furnace/Reactors
- Steels and Metals

PSC-GRF11N

Ratio pyrometers with fiber cable for industrial applications

Technical data				
Type	PSC-GRF11N			
Temperature range	300 to 1100°C	350 to 1300°C	400 to 1600°C	500 to 2300°C
Sub temperature range	adjustable within temperature range, minimum span 50°C			
Spectral range	Channel 1: 1.45 to 1.7 µm // Channel 2: 1.65 to 1.9 µm			
Optics	variable focus optics ROH I-100, ROH II-65, ROH II-250			
Distance ratio	see table			
Measurement uncertainty ¹	0.5 % of measured value in °C + 1°C			
Reproducibility ¹	0.2 % of measured value + 0.5°C			
Transmittance	50 % to 100 %			
NETD ^{1,2}	0.1 K			
Response time (t ₉₅)	5 ms ³ , adjustable up to 100 s			
Ratio correction K	0.800 to 1.200			
Emissivity	0.050 to 1.000 (1-channel mode)			
Storage	minimum and maximum value storage			
Output	0/4 to 20 mA, switchable, temperaturlinear, max. burden: 500 Ω (galvanically isolated)			
Interface	RS-485 (galvanically isolated), half duplex, max. baudrate 115 kBd, Modbus RTU			
Aiming	laser aiming light, 630 nm to 680 nm, class II, < 1 mW			
Switching output/thresholds	1 opto relay, R _{load} min. 48 Ω/adjustable within temperature range			
Software	PSC-Spot for Windows®			
Parameters ⁴	ratio correction, emissivity, transmissivity, response time, temperature unit °C or °F, storage, settings, sub temperature range of output, switching thresholds of switching output			
User controls	display and keyboard for parameter setting			
Power supply	24 V DC ± 25 %, residual ripple 500 mV			
Power consumption	max. 1.5 W (without load on switching output)			
Operating temperature	0 °C to 70 °C (electronics), 0 °C to 250 °C (optical head) 0 °C to 250 °C (fiber cable), 0 °C to 150 °C (fiber cable with 90° curve)			
Storage temperature	-20 °C to 70 °C			
Weight	appr. 600 g (without fiber cable and optical head)			
Dimensions	appr. 110 mm × 80 mm × 40 mm			
Housing	alu housing with plug connector, display and keyboard			
Safety class	IP 65 (DIN 40 050)			
CE symbol	according to EU regulations (EN 55 011)			
Scope of delivery	PSC-GRF11N, manual, inspection sheet, PSC-Spot for Windows® (no connection cable, fiber cable and optical head, please order separately)			

¹ T_{ambient} = 23 °C, ε = 1, t₉₅ = 1 s. ² Noise equivalent temperature difference. ³ With dynamic adaption at low signal level. ⁴ Adjustable via interface and software or directly at the device.
